

Everyone.net business email gives you the power of a hosted email solution with the control and flexibility of an in-house system.

Outsource your email to Everyone.net and enjoy the benefits of a robust, scalable and cost effective business email solution. Email is one of the most highly valued business tools, but it's also:

- The business tool most prone to vulnerabilities – viruses, spam and malware.
- The business tool that consumes the most resources – IT staff, storage, and other capital.
- A complicated infrastructure to build and maintain.
- Your professional image: email contributes to corporate credibility, investor confidence, brand equity, and customer loyalty.

Everyone.net Business Email Key Features

- Custom tailored mailbox and storage configurations
- Rapid deployment and simple migration
- Advanced anti-spam and virus protection package
- 24x7x 365 priority support and monitoring
- Compatible with all popular Web browsers and email programs
- "Anytime, anywhere" access including true "push" to wireless devices

World-Class Email Service

Everyone.net Business Mail equips your employees with essential corporate email features without the cost and complexity of large enterprise systems. Every Business Mail account features:

- 99.99% Uptime – Unsurpassed reliability starting at \$15.00 a month for 5 users.
- Instant Setup – No hardware to buy and configure. No software to license and install.
- Technical Support – Easy access to support tools and our email experts.
- Significant Storage per User – More than ample storage for thousands of messages and large file attachments.
- Effortless and Limitless Scalability – Add email accounts whenever your business grows.
- Works with all Popular Web Browsers – Business Mail's web-based email client includes a Rich Text Editor with Ajax support and built-in Spell Checker.
- Works with all Popular Email Programs – Features standard Internet email protocols (IMAP, POP, and SMTP) used by Outlook, Outlook Express, Entourage, Thunderbird, Apple Mail, and others. IMAP keeps messages and folders in sync between the office, home, and on the road!
- Treo and other Smartphone Support – Business Mail supports true "push" email allowing your mobile users to stay up-to-date, and fully sync their email on the road. No need to buy and maintain tens of thousands of dollars of equipment!*
- Shared Address Book – Keep everyone in your company up-to-date with the latest contacts. Shared Address Book can be accessed via Web Mail, Outlook, or most any other LDAPv3 client.

ABOUT EVERYONE.NET

- Headquarters in **San Jose, CA**
- Powers email services for more than **300,000** domains worldwide since **1998**
- Trusted by national service providers such as **Netscape Communications** and businesses like **Wolfgang Puck Fine Dining**

–Wolfgang Puck Fine Dining

- Business Calendar – Stay organized by planning daily, weekly, and monthly activities. Send and receive meeting announcements from Web Mail and standards-based email clients (i.e., iCalendar, Outlook).

Complete Control

Everyone.net Business Mail keeps you in the driver's seat with our easy-to use, yet powerful web-based application for email provisioning and user management.

- Create, edit and remove email accounts and email aliases.
- Search by login name, last name, and other specific criteria to find the right user fast.
- Change user passwords and update user profiles with ease.
- Customize Web Mail interface elements, layout, text, colors, fonts, images, page properties, welcome letters, storage quota limit warning letters, and more to match your corporate identity.
- Integrate the Web Mail login interface into your Intranet or simply use the default page.
- Send HTML or plain text email to all of your employees.
- Manage domain-level policies – create inbound and outbound email rules for additional custom spam filtering, protect aliases from spam, archive messages and monitor email accounts.

Total Protection

The Everyone.net Total Protection software-as-a-service (SaaS) suite includes SpamShield Pro, which provides an extremely sophisticated anti-spam and anti-virus technology that protects your business and employees from the onslaught of malware.

The Total Protection suite delivers:

- Always up-to-date, Sophos anti-virus and anti-spam scans of incoming and outgoing email as well as intelligent blocking of attacks at the source.
- BounceShield, which eliminates forged returned messages.
- Automatic blocks by IP address.
- Automatically moves unwanted email to a Spam Folder for review or to the Trash.
- Option to hide images with Web Mail to block offensive graphics and bugs.
- SpamShield Score message headers, which enable SpamShield Pro for POP clients.
- Approved Sender lists allowing trusted email addresses or domains through.
- Blocked Sender lists reducing messages from spammers.
- Email rules providing advanced control and instant server-side filtering.
- 128-Bit SSL encryption securing Web Mail, IMAP, POP, and authenticated SMTP connections.
